## About the Institution

Sri Lakshmi Ammal Educational Trust was established with a visionary mission to transform higher education in Tamil Nadu. In 1984, under the dynamic leadership of Dr. S. Jagathrakshagan, the Trust founded the Bharath Institute of Science and Technology (BIST), marking a historic milestone as the first self-financing engineering college in the state. This pioneering initiative laid the foundation for the Trust's future ventures in medical, dental, and allied health sciences education.

Continuing its commitment to academic excellence, the Trust established Sree Balaji Dental College and Hospital in 1989. The institution rapidly gained prominence and, in July 2002, was granted the status of a Deemed to be University by the Ministry of Human Resource Development (MHRD), Government of India, under Section 3 of the UGC Act, 1956. This recognition marked the birth of the Bharath Institute of Higher Education and Research (BIHER), under the ambient of which a growing network of prestigious institutions has flourished. Together, these institutions reflect the Trust's unwavering dedication to providing world-class education. Today, BIHER stands as a premier educational conglomerate, offering multidisciplinary, multicultural, and high quality education to nearly 20,000 students every year from across the globe.

Call for papers

Papers are invited from industrial persons, academicians, research scholars PG, and UG students from various institutions in the following areas.

MECHANICAL ENGINEERING THEMES

Product Design and Development, Composite Materials, Smart materials ,Applications of AI in Manufacturing CAD/CAM, Design for Manufacturing and Assembly , Precision Machining, Advanced casting technologies, NDT of Composites, Bio materials, Near net shape manufacturing, MEMS, Shape memory alloys

AUTOMOBILE ENGINEERING THEMES

Alternative fuels, Automotive electronics, Electric vehicles, Fuel cells, Engine emission analysis, Design of automotive systems, Advanced vehicle propulsion systems, Battery ageing in automotive systems, Hybrid cars

MECHATRONICS ENGINEERING THEMES

Industrial robotics, Automation and control, Intelligent manufacturing systems, Machine vision system, Automated guided vehicles (AGVs), Robots for underwater welding, Cybernetics (AI), Robots in high temperature welding, Rehabilitation of robotics and Mechatronics, Biomechatronics, Surgery robots, Space robotics
