### Abstract:

A topical cosmetic product is formulated by incorporating extracts or bioactive components derived from two or more plants to achieve synergistic effects of various phytochemicals with better cosmetic benefits. A topical facial scrub was formulated by incorporating extracts or bioactive components derived from two or more plants. Particularly, the herbal scrub consists of Black grapes extract as an antioxidant, Passion fruit extract as an antioxidant, Walnut Powder as an Exfoliating agent, Cherry moisturizing agent, Cetyl alcohol as thickening agent, Stearic acid as surfactant, Glycerine as humectant, Triethanolamine as Neutralizer to balance the pH, Verstatil as preservative, Borax as a Preservative, and lavender Oil as Fragrance and deionized water. Upon evaluation of the prepared herbal scrub formulation, it was found to semisolid and homogenous consistency with neutral PH, good spreadability, Non-irritated nature and easy washability. Further, the formulation was found to possess antimicrobial activity when tested against Escherichia coli and Staphylococcus aureus.
