Abstract:

TITLE: A PROCESS OF PREPARATION OF STAINING HISTOPATHOLOGY TISSUE SLIDE EMPLOYING STRAWBERRY EXTRACT APPLICANT: SREE BALAJI MEDICAL COLLEGE AI
 ABSTRACT The present invention discloses a non-diagnostic staining process for staining biological samples comprising cells employing characterized eosin free stain
 The process of the present invention comprises of the following sequential steps: contacting the biological samples with deparaffinizing agent Xylene for removing irr
 for fixation and clarity of tissue in the samples; dipping the biological samples with acetone for decolourization followed by washing in tap water; staining the biologic
 with staining agent Haematoxylin for staining cytoplasm followed by washing in tap water; dipping the biological samples with 1% acid alcohol for removing excess H
 followed by washing in tap water; staining the biological samples with characterized staining agent strawberry fruit extract for staining nucleus followed by washing ir
 washing the biological samples with alcohol for removing water and drying the biological sample and mounting to form stained biological sample with staining struct
